Via: N7

Subj: NR PWC SUBIC DET BAHRAIN NLSF NEWSLETTER INPUT

1. Arrived Sunday night the 13th in the pouring rain, all slept in the empty morgue at an Army Field Hospital. Very cold first several nights, not the public/CNN vision of the desert. Have since moved into tents in the hospital compound. Good food - Army field mess, we have our MS's helping. Rain stopped after two days, quite warm today.

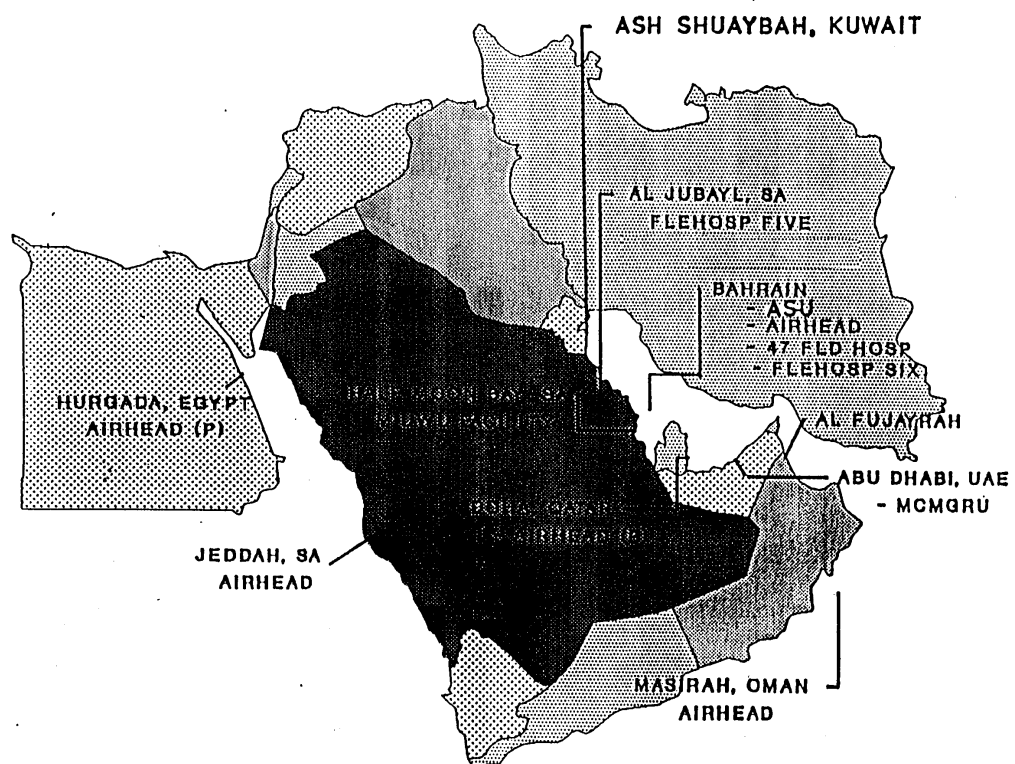

2. A mobilized Naval Reserve unit of 250 Seabees based in Alameda, California, we have men and women from Minnesota, North Dakota, Idaho, Washington, Oregon, Utah, Nevada, Hawaii, and a bunch from California. We brought 145 from Subic Bay in the Philippines to Bahrain to augment COMUSNAVLOGSUPFOR's construction capability. We've already got two dets of 12 each out, one to Saudi Arabia and one in the UAE; one of 3 in Egypt; plus the 20 at Fleet Hospital Five. We have 8 working at the Embassy Annex, the new HQ's for COMUSNAVLOGSUPFOR, 27 augmenting the PWD at ASU, Bahrain, and 7 assisting in ROICC functions, either with US or Gov't of Japan (GOJ) funds. The balance (53) is doing project work at the Army's 47th Field Hospital. It is located on newly leased land (13 acres) contiguous to the ASU. We are building a permanent perimeter fence (concrete wall, chain link, and barbed wire), a large wood semi-permanent galley, and five wood shower/head facilities for the hospital. We're turning out to be the theater's firemen, able to respond quickly for whatever and wherever needed.

3. Kind of like the strike we worked in Subic, the war started a few days after we arrived. Spent the first several nights going in and out of "Scud Alerts", donning and getting out of MOPP gear. But that's for next month's report.
